Whirl-A-Way technical specifications

CL-50 Whirl-A-Way Polymer Removal System

The Whirl-A-Way CL-50 removes polymer residue and extends the life of washout solutions. This low-maintenance system uses centrifugal force to separate suspended polymer solids from water flexo washout solutions. The solids are collected in a disposable plastic bag while the clean washout solution is re-circulated back into the system for reuse and improved efficiency. The Whirl-A-Way CL-50 is a simple-to-use system with components easily accessed from the front.

Remove Polymer Residue and Extend Washout Solutions

dimensions
- 24" (wide) x 27" (deep) x 48" (high)

electrical
- 120 volts / 1-phase / 60 hertz / 12 amps

weight
- 360 lbs.

For 50 years, A&V has supplied materials and equipment that are good for you and good for the environment.
